

# SABRINA VOTH

contact@sabrinavoth.ca

## EXPERIENCES

- Created an entire suite of automated financial reports via custom SQL queries in MS-SQL Server Reporting Services that continue to provide autonomous overview and detailed views of the company
- Developed sales automation and implemented business rules to connect to 3<sup>rd</sup> party warehousing API's to ease inventory management and speed sales processes
- Developed online storefront via an e-commerce platform including complex business rules, shipping automation and inventory/ warehouse integration, supplementing a primarily sales-employee based income
- Performed a local as well as cross-atlantic/remote office move with minimal IT downtime
- Developed SharePoint tools for ISO requirements (QMS) required for ISO compliance
- Developed a sales front-end for SAP B1 via an internal ASP.NET website with the intent of streamlining sales processes and integrate external services such as customer relations management software
- Acted as Point of Contact for any and all IT related issues for a global company, providing sufficient support to remove external IT support contracts that were intended to be kept alongside my role
